Unit VI Louisiana's Musical Landscape
Lesson 2 Listening Logs

Sample Listening Logs

Name_____ **Date** _____

- Study the **Sample Listening Log** below, to see how the data are organized. Is this the best way to organize the data you have recorded while listening? Perhaps you need more columns, or lists of items to check off above the table. Perhaps you need titles followed by blank lines to insert names or other data.
- Look at the **Listening Log for Community Soundscapes** and **Listening Log - Music Around Me** worksheets for more ways to display data.
- Study your data carefully and make a list of all of the different types you have. Then design a listening log on the computer using the **Creating Tables and Frames with Microsoft Word** <http://www.louisianavoices.org/Unit6/ edu_unit6w_creating_tables.html> or **Spreadsheet** <http://www.louisianavoices.org/Unit8/edu_unit8w_spreadsheet_dir.html> worksheets.
- Add your data to the log. Discuss how these tables, response blanks, boxes, etc. help you to understand the data.

Sample Listening Log

Date: September 24, 2004 **Length of Listening Session:** 15 minutes

KIND OF SOUND HEARD What is the specific sound you are hearing?	**WHAT MADE THIS SOUND** Does it come from nature, the radio, TV, choir, friends, family members?	**DESCRIPTION OF SOUND** What words would you use to describe the sound?
Boom from a truck/car	A truck or car	Loud, deep, startling
Humming	Mom	Mom singing while she does dishes – lonely, cozy
